## EASY TO CLEAN AND HYGIENIC

For use in the food industry, pharmaceutical technology and chemical industry drives have to be constructed absolutely hygienic and easy to clean. This characteristic is also called "Hygienic Design". Cooling fins and other interfering edges are absolutely unwanted. Rehfuß offers with the Cleanness product range optimal solutions which meet the highest EHEDG standards. The drives are available in aluminum – with a special coating system – as well as completely in stainless steel.

### Aluminium version:

Worm gearbox with  
Smooth-body-motor

Helical gearbox with  
Smooth-body-motor

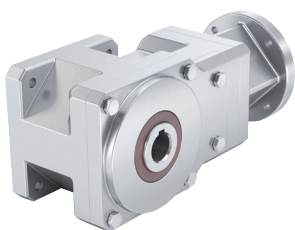

Shaft mounted gearbox with  
Smooth-body-motor

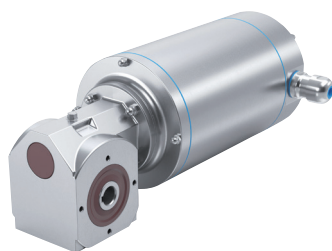

Smooth-body-motor  
made of aluminium

### Stainless steel version:

Bevel helical gearbox  
KS210

Worm gearbox with  
Smooth body motor

Stainless steel motor  
SBH

Stainless steel motor  
SBE
