EASY TO CLEAN AND HYGIENIC

For use in the food industry, pharmaceutical technology and the chemical industry, drives must be designed to be absolutely hygienic and easy to clean. This property is also referred to as "hygienic design". Cooling fins and other interfering edges are absolutely undesirable.

With the Cleanness product range, Rehfuß offers optimum solutions that meet the highest EHEDG standards. The drives are available both in aluminum - with a special paint finish (e.g. FDA-compliant) - and completely in stainless steel.

Can be combined with our smooth body motor Aluminum SBA:

Worm gearbox SM with
Smooth body motor
Aluminum SBA

Helical gearbox SR with
Smooth body motor
Aluminum SBA

Shaft mounted gearbox FG
with Smooth body motor
Aluminum SBA

Smooth body motor
Aluminum SBA

Stainless steel version:

Bevel helical gearbox
KSN

Worm gearbox SMN with
Smooth body motor SBH

Worm gearbox SMN with
stainless steel motor SBH
with IP69K

Stainless steel motor
SBH

Stainless steel motor
SBE

Planetary gearbox
PNH

Planetary gearbox PAH „anodized“:

Rehfuß Drive Solutions GmbH
